Honaunau, Hi 96726, U.S.A.

Maria de Lourdes Pintassilgo
Prime Minister of Portugal

Dear Prime Minister Pintassilgo;

It was with great interest and pleasure that I read the interview you gave Maria Isabel Barreno and the MS. Magazine coverage accompanying it. Honestly I think you are one of the most important people in the world today. In your principles and actions I sense the return of Christ. Your mission on Earth is as important as any and I wish to be considered an associate.

Being of the male gender I understand intimately the mechanism whereby men are artificially separated from mother (Nature) and therefore from God. It begins about the time the mother teaches her son to take responsibility. This can anger the son whereupon he proceeds to "walk all over" his mother. She may act in various ways but until he faces up to the discrepancy in his behavior the boy can only be counted on to fill the male dominated roll. His peers confirm his misapprehensions and they grow up to form a male dominated society.

The mystification of power lies in the fact that men would have to be much more honest even to understand themselves let alone pass on a true understanding to a woman. So we all are somewhat mystified by an habitual misuse of power.

I believe, as you do, in using silence to make the final explosion. In fact it has already happen in many people's minds. I feel it is The Second Coming of Christ: The Universal Love. It is the alternative to an atomic bomb explosion. Isn't it?

I recognize that the woman's way leads to the Inner Path of Christ. And, that only when Man is living by Spiritual Law can we be truly safe in this existential travail on Earth. Because of this I am involving myself in forming a new political party tentatively known as, The Woman's Way Political Party. Our purpose is to largely replace and cut the present U.S. Government which we believe is corrupt in as much as it does not adequately represent women. We feel the present government is too large to change fast enough to avert disaster in many areas.
