Women and peace

1. Factors to be taken into account:

- concept of "peace" in official churches documents and in theological thinking;
- statements of UN concerning women's contribution to peace;
- aspects of UN work where the women's situation are, in fact, threatening to world peace;

2. Method to be followed by which an int'l conference could take place:

- conscientization as the on-going process
- the challenge of a given situation objectified
- to jump from the local to the int'l network of economic + political relationships
