PERSPECTIVES OF SOCIAL CHANGE:

	Perspective 1	
The problem:	- underdevelopment: poverty	
What needs to change?		
Causes of social imbalance: Why does this problem exist? Where does it start?	- inequality of opportunities for all men; lack of economic and technical tools for industrialization - social immobility	-
Goals for social change: Where do people want to go?	- economic growth - modernization according to the model of scientific and industrial progress	The state of the s
Criteria for change: What are the ground rules? What are the basic assumptions? Fundação	- technology has priority as the way to progress - efficiency and productivity matter the most - competition is good and necessary to	
Types of cultural action: How do people plan to make changes in basic life patterns?	- foreign aid and development expertise - development of technical skills at all levels - opening people to progress & evolution	
Types of direct political action: How do people make changes through specific political organizations?	- encouraging participation in existing political structures - intervention through trade unions and political parties	
Concepts of Christian presence in the world: What is the responsability of Christians?	- Christianizing social structures - the Church seen as the "perfect society" and norm of the world	
Positive features and inherent limitations of using only this perspective	- helps to solve basic needs - paternalism; overvalueing of efficiency
