

1. We are facing a new political reality at the world level : democracy has become the target for political action of individuals, communities, nation-States.

Democracy, in its best forms, contains several ingredients which I want to underline at the outset :

- it is based on the principle of fundamental equality before the law and the State

of all individuals <sup>as</sup> finite human beings; it repels all forms of discrimination (only started in 20 cent. - ♀!)

- it embodies, either by legislative act or by tradition, a body of norms + rules

to which all individuals and institutions have to follow, thus constituting a state of law;

# Equality<sup>of</sup> / dignity of all peoples (confederal)

- all peoples are builders of Europe
- all have chosen  
democratic path  
an economic system
- all are facing together the steps to be  
taken towards the progress of economic life in an  
attitude of burden-sharing
- all are<sup>+</sup> partners (with a  
special resp. in the world)  
in the safeguarding of the environment
- all want to learn their common  
history
- all ~~feel~~ are aware + committed  
to the development of the Scheme.

- Here is the end of a balance imposed  
now there is imbalance

↓ to create a new balance

through cooperation, to reaffirm CSE

4th basket: environ/

- combination of forces of integral  
+ derintegral - on regional lines

↓ how to integrate them

into a harmoniz develop of E.?

- not to create new intity + bureaucrat

∴ laisser les inst / se développer

- importance ONG

→ define Atlantic to Rio Gural ... until Vladivostok

→ Atlantic community  
- demarcations

→ what functions?  
hold together? or separately?  
what is global? what is regional?

→ relations with group of 7; Japan?

### Problems

- sovereignty: what is a sovereign state?
- popular movements: Canada / EEA / Australia  
those who receive most
