

Governance + \bar{h} rights

I. Indivisibility of \bar{h} rights

- a) very recent "discovery" at the individual + institutional level
- b) opens new perspectives for governance, because so far : - distinction between rights which can be immediately put into action + rights for which special allocation of funds is necessary

II. Meaning of CdS recommendations

- a) attempt to add (to EU) other dimensions
- b) to give shape to the "European ^{social} model"
- fallacy today, yet historical steps

• Shift in governance

a) its goals:

- to deepen democracy
- to promote/protect/defend human rights

b) general umbrella since II WW

- from budget balance + low inflation to "development"
- development used mostly for S Hem. while N Hem. evolved the welfare state as a compensation for the hazards of industrialization + urbanization

c) "develop/" models:

- growth + technological progress → sustainable → human ...
↓ dominant today
- fallacy of current use of word "development" as equated with economic growth

d) need to discover a concept which expresses at the same time

- a renewed relationship between gov. + people and the advisability of L rights

We need to know what pol. + legal privileges the
citizens enjoy (1/2)
