

The school,

the medical services + the hospital  
the public services of all kinds,  
the media

— they do concern all citizens in a paramount way at  $\neq$  stages of their lives.

Therefore, the social partners, the social actors cannot be confined anymore to the relation employers/trade unions inherited from the industrialist era.

Moreover, women cannot accept democratic institutions as they are. They didn't struggle for so long for their autonomy to be stripped of it ~~we~~ because of the party discipline!

As Christian women,  
we have to put political reality on its own realm:

"Sabbath is for men  
+ not man for the Sabbath"

The political institutions as they are  
don't draw in the most competent people  
~~and tend~~ because they become <sup>less + less</sup> ~~more + more~~  
~~devoted of the~~ <sup>degree of</sup> ~~to~~ work towards problem-solving  
+ more + more conducted by the  
logic of the power-struggle.
