

I. Population, ^{the human} ~~as a living~~ factor

1. Pop. as part of nexus pop./dev./env.
If there is urgency, it is about each of the three and, most of all, of their interfaces

2. Pop. as the cum total of human, indiv. stories
Pop. ^{here} is not the ^{only} subject of demographic science, but ~~the~~ the subject of many other scientific + common perceptions. (compare with nuclear sciences)

Fundamental question of civilization: Humans are not interchangeable with "things", they are the subject + goal of social processes. (∴ beings)

3. QL perceived as the horizons of Pop. questions

Intuition of Com. confirmed by all testimonies at Hearings. Fundação Cuidar o Futuro

QL ^{as} wide spectrum of human condition covering from security to harmony.

4. "Pop. growth" in ~~the~~ context

- Factors present in dynamic pop. balance:
- those common to all manhood + all ages
- those resulting from industrial civil.
- those pertaining to the post-ind. civil.

5. Pop. policies?
